

Compiling and Running StackTest.java

Open a terminal or command prompt window and navigate to the folder wherein your code is. Make sure that the Java compiler, `javac`, is on your environment variable **path**. Compile and run the Java code as shown below.

```
Command Prompt

D:\Dropbox\algDemo\skel>javac StackTest.java

D:\Dropbox\algDemo\skel>java StackTest
Stack is created

Stack contents are:
7 11 3 10

D:\Dropbox\algDemo\skel>
```
